

JLG Forklift Part

JLG Forklift Parts - Following retirement in the late 1960's, John L. Grove started on a cross country RV expedition. After spending numerous years establishing his family built crane business with his brother, John had no idea that this journey would give birth to the rise of JLG Industries, Inc. The world leader of mobile aerial work platforms and precision material handling equipment was the end consequence of a road trip.

While on their trip, John spent time talking to previous business associates whom the Groves stopped to visit along the way. These conversations combined with a tragic incident-two workers being electrocuted on scaffolding when the Groves were traveling to the Hoover Dam- John uncovered a vast marketplace for a product that could swiftly and safely elevate people in the air to accomplish upkeep and other building functions.

Upon returning from their travels, John established a joint venture with two friends and obtained a metal fabricating business in McConnellsburg, Pennsylvania. In 1970, starting operations with a crew of twenty personnel, they designed and sold the first JLG aerial work platform. The company incorporates many of the simple design essentials of that original lift into current models.

Since then, JLG Forklifts have come a long way from when Mr. John L. Grove returned from his fatefull cross-country journey and since the first JLG aerial platform entered the marketplace. As of today, the business has extended itself into quite a few international marketplaces and continues to cultivate innovative machines to ensure that customers are able to become safer and more efficient within their workplace.
