

Barrel Clamps

Barrel Clamps - Referred to as "Barrel Clamp", this particular hydraulic attachment is used on forklifts in order to squeeze objects that you need to move utilizing the forklift. Typically, they are utilized to handle kegs, paper rolls and barrels, along with a few barrel clamp designs being able to revolve the cargo. Like for example, the rotate function enables the individual operating the forklift to be able to slot in a vertically stored paper inside the horizontal intake of a printing press.
